

Next Time You wants your subscribers to get rid of Unsolicited incoming calls, Ask them simply to make a Black List of unwanted numbers and Blackball takes care of the rest.

**Real-time analysis:**

When Blackball subscribers have an incoming call, application instantly detects the caller and if the caller exists in Blacklist, application sends a busy tone or user specified prompt immediately and the callers won't even know that they are blacklisted.

**CLI Restricted Calls**

Subscriber can restrict calls without CLI.

**Schedule:**

Scheduler makes users Blacklist completely automated personal secretary. The service can reject everyone except family member at night; accept only co-workers at business hours on working days, etc.

**Wildcard \* pattern Blocking:**

Subscribers can configure blacklists starting and ending with certain numbers.

Ex: 08392\*, \*24447\*

# BLACKBALL

## Intelligent Call filter

Keep unsolicited incoming calls off your phone

Blackball protects your time and peace of mind by keeping unsolicited incoming calls off your phone

Blacklist: Using this you can avoid calls from specific numbers, specific area codes and in specific time

Whitelist: Whitelist saves user from excessive roaming charges where user receives calls only from family apart from unwanted calls.
